EDUCATION

SHARNBSVA UNIVERSITY
Bachelors Of
Computer Applications **(BCA)**
June (2024)
CGPA: 8.5/10

COURSEWORK

Object Oriented Programming
Artificial Intelligence
Data Structures & Algorithms
Software Engineering
DBMS & MySQL
Operating Systems
Cloud Computing

TECHNICAL SKILLS

Languages: Python, MySQL, JavaScript

Libraries & Tools: Confluence, Git & GitHub

Databases: MySQL, AWS, Google Cloud

Concepts: Data Analysis, Data Visualization, OOPs, Software Development Lifecycle

CERTIFICATIONS & AWARDS

- Team Applause Award, Issued by TCS -2024. View Certificate
- Infosys Springboard Ideation 2024 - View Certificate
- Generative AI by LinkedIn Learning (2024) – View Certificate
- Certified "Geo Processing using Python" — ISRO, India. View Certificate

EXPERIENCE

Tata Consultancy Services (TCS) — Analyst
Hyderabad, India | August 2024 – Present

- Engineered and validated map geometries for major navigation platforms, improving spatial data coverage by 35% and boosting positional accuracy for millions of global users.
- Researched, implemented, and optimized routing algorithms (Dijkstra's, A*) to enhance shortest-path computations and real-time navigation.
- Collaborated with international engineering teams to deliver seamless, large-scale map updates, meeting aggressive SLA timelines.
- Documented workflows and best practices in Confluence, increasing onboarding efficiency by 20% and supporting knowledge transfer across teams.
- Awarded "Team Applause Award" for leading cross-functional milestone deliveries and excelling under tight deadlines.

PROJECT(S)

AI-Powered Adaptive Traffic Signal Control System (TSCS- Management)
Technologies: *Python, YOLOv8, OpenCV, Raspberry Pi*

- Developed an end-to-end adaptive traffic signal system using YOLOv8 and OpenCV for real-time vehicle detection (30–60 FPS, 90%+ accuracy at 4-way intersections).
- Created and implemented a density-based signal timing algorithm, reducing average wait time by 25% and improving traffic flow by 35%.
- Integrated a real-time traffic analytics dashboard, driving actionable city-level insights for smarter traffic management.
